## Business Women Forum-Palestine

The business Women Forum (BWF) is established in 2006 as a national NGO with the mission to help “strengthen the role of businesswomen as leaders in the Palestinian economy through advocacy, networking, and the provision of business services”.

Since 11 years, BWF is accumulating expertise to become one of the leading organizations in closing the Gender Gap through focusing on women economic empowerment. Closing the gender gap in terms of access to economic opportunities and productive resources can have a significant impact on women’s lives, those in their communities and the economy as a whole. Gender equality and economic empowerment for women have been recognized as preconditions for inclusive growth and have been proven to have positive development outcomes.

Keywords: women economic empowerment entrepreneurship mentoring access to market access to finance
